

Robustness & Deep Uncertainty

Lecture

Dr. James Doss-Gollin

2026-03-23

Coming Soon

This lecture is under development.

Content to adapt from previous course:

From Robustness lecture:

- Definition: “insensitivity of system design to errors” (Matalas)
- Robustness metrics taxonomy (Herman et al.)
- Regret and satisficing approaches
- Bottom-up vs. top-down analysis

From Deep Uncertainty lecture:

- Spectrum of uncertainty
- Lempert-Schneider debate
- When probabilities help vs. exploratory approaches
